

Discover Daikin's vision on the future of heating and cooling at ISH25

Vienna, January 2025 – New solutions, strong installer partnership and well-considered refrigerant strategy take centre stage. Daikin is set to showcase its most ambitious range of cutting-edge and efficient heating and cooling innovations at ISH25 in Frankfurt, Germany, on March 17-21, 2025. Highlights include the latest **Daikin Altherma 4 residential heat pump**, as well as commercial innovations such as the **CO₂ VRV**. With a focus on new solutions for all applications, strengthened partnerships with installers, and a commitment to a safe and unique refrigerant approach, Daikin highlights its leadership in driving an innovative future for the industry.

Innovative solutions for all applications

March 17-21 2025

At ISH25 Daikin will introduce its most versatile portfolio to date, running on a variety of refrigerants and tailored to diverse needs. These include the latest **Daikin Altherma 4 range running on R290** and an **extended Multi+ range using R454c**, both addressing the needs of the residential housing market. For larger applications, the new **VRV with CO₂** will be unveiled, as well as the **Daikin Chiller, using R-290**, which allows a modular set-up for industrial purposes.

These innovations, complementary to the existing portfolio running on R-32, make it easier than ever to **transition away from fossil fuels across applications** – whether it's **heating a small home, managing climate control in an office or cooling a factory**. With solutions designed for all environments, from scorching summers to icy winters, Daikin continues to empower sustainable, society-wide decarbonisation.

Driven by Care: supporting professionals at every step

Daikin's commitment to installers is at the heart of its success. Therefore, next to product solutions, Daikin will showcase its professional support and service offer, backed by a large network of skilled installers across Europe.

The **online residential support platform "Stand By Me"** is already widely used by Daikin's installers. The platform will be further expanded for all residential heat pump solutions, including air-to-air heat pumps. This **"Stand By Me Certified Partner" program** will provide training and certification for safe and effective installation and after-sales care.

For commercial and industrial applications, our expertise in HVAC services is now delivered through **"Daikin 360 Integrated Service Solutions"**. The platform provides all the services needed for installations to run smoothly, and to help control maintenance and operational costs.

With **116 training centres across Europe** – 10 out of them in the CE-region – and a growing network of skilled professionals with **over 3,400 HVAC-R partners in the CE-region** alone, Daikin is simplifying the path to partnership for new installers through hands-on and online learning opportunities.

Safety and sustainability at the core

Daikin leads the way, with innovations that prioritise safety and quality in both product and installation. Its unique refrigerant approach supports the best-balanced refrigerant choice for every application. Daikin has been pioneering solutions in the heat pump sector, with a strong regional focus, having developed and produced solutions in Europe, for Europe, for over 50 years.

"Safety and sustainability drive everything we do," says **Carl Lievens, General Manager Heating & Renewables at Daikin Europe**. "With over 100 years of innovation and more than 50 years of developing solutions for Europe, we once again confirm our leadership position in the heat pump industry. Our **Daikin Altherma remains the most sold hydronic heat pump in Europe since its launch in 2006¹** – a testament to our dedication to quality, efficiency, and reliability. As we introduce these new solutions at ISH25, we also call on the entire industry to join us in prioritising safety and sustainability."

About

100 years Daikin

The story of Daikin has always been shaped by groundbreaking ideas, technological innovations, and dedicated people. It began in 1924 when the young Japanese engineer Akira Yamada founded an enterprise in Osaka to manufacture aircraft radiators with a 15-member team. Today, 100 years later, the Daikin Industries Ltd. group brings **future-proof solutions for heating, cooling, ventilation, air purification, and refrigeration to global markets**. More than 98,000 employees in 175 countries continue the company's legacy of leading technologies to advance low carbon heating and cooling, while ensuring the highest level of comfort. For its fiscal year 2023 the global Daikin Group reported a record sales result of € 28 billion sales (1 April 2023 – 31 March 2024).
