

Smart Climate Control for Cafés, Hotels, and Shops

Energy-efficient heating and cooling solutions that keep your space comfortable and your profits growing.

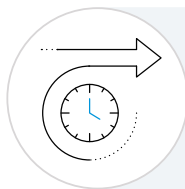

Imagine a space where customers linger longer, leave glowing reviews, and can't wait to come back. Where your team feels energized and productive, no matter the season. With Daikin, you can create that perfect environment—without worrying about high energy bills or disruptive installations.

Daikin makes it easy to stay ahead with energy-efficient heating and cooling solutions designed for small businesses like yours. Quiet, discreet, and cost-effective, our systems keep your space comfortable year-round while reducing operating costs. With a return on investment in as little as 4,4 years—and the flexibility to relocate your system if needed—it's a smart, future-proof investment in comfort, efficiency, and customer satisfaction.

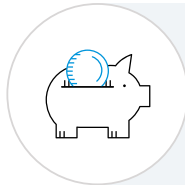

No Barriers to Better Comfort

Investing in a new heating and cooling system may feel like a big step—but with Daikin, it's simple. Our smart, efficient solutions address common obstacles, helping you create a comfortable and cost-effective space for your business.

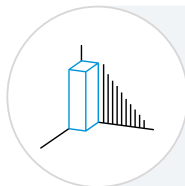

I can't afford to close the shop for renovations!

Daikin's systems are installed in as little as 1-3 days with minimal downtime. Installation can even run in parallel to your existing heating setup, so you can keep serving customers while we work.

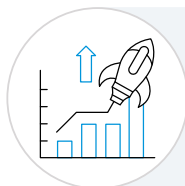

Won't this just increase my energy bills?

Daikin's A++ heat pump technology delivers efficient heating and cooling using renewable energy from outside air. With up to four times the efficiency of gas systems, it helps control running costs—giving you reliable comfort while keeping expenses in check.

My space is too small for bulky systems.

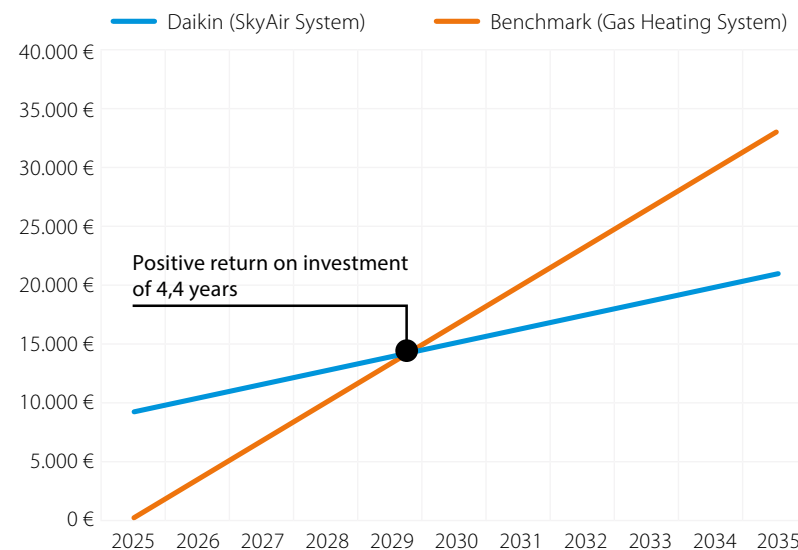

Our units are designed for compact, flexible installation, making them an ideal fit for small or challenging spaces. With quiet outdoor units, even businesses in residential areas can operate without disturbing neighbors.

Isn't this too expensive?

Upfront costs matter, but long-term savings make the difference. With a return on investment in as little as 4,4 years, Daikin's energy-efficient systems deliver lasting value without compromising comfort.

TOTAL COST OF OWNERSHIP / YEARS - ROI

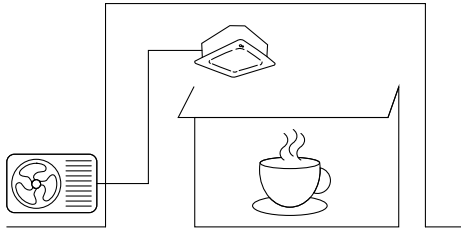

Disclaimer: This case study compares the Daikin SkyAir system with a traditional gas heating system in café, bars and restaurants, focusing on heating operations under these conditions: Winter (-12°C), Summer (+35°C), gas at 12 cents/kWh, electricity at 22 cents/kWh and comfort heating operation of 2115 hours in accordance to present EU guidelines for energy usage.

Based on these parameters, the Daikin SkyAir system repays its investment in 4,4 years while offering long-term savings. As a heat pump, it also provides cooling benefits during summer for year-round comfort. Results may vary based on location, usage, and other factors.

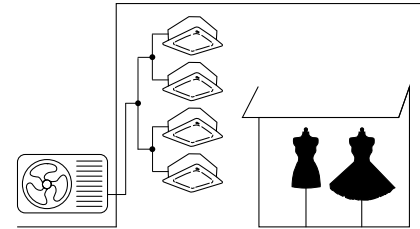

The Right System for Every Space

No matter where your business is located—a modern high-rise, historic district, or residential area—Daikin's SkyAir delivers energy-efficient comfort with flexible indoor and outdoor solutions. The discreet design and advanced technology ensure a perfect fit, even in locations with space or noise restrictions.

Pair Solutions

Perfect for smaller spaces like boutiques or intimate cafés, where one outdoor unit pairs with a single indoor unit to deliver reliable comfort without taking up valuable space.

Multi-Indoor Solutions

Ideal for larger spaces like restaurants or hotels, where a single outdoor unit connects to multiple indoor units. This provides consistent comfort across multiple rooms or zones while maximizing energy efficiency.

Flexible Indoor Options to Suit Your Design

Whether you need a simple solution for one room or comprehensive comfort across multiple areas, Daikin's systems combine flexibility, energy efficiency, and design to keep your business comfortable all year long.

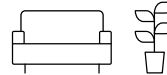

Ceiling-Mounted Cassettes

Save floor and wall space with efficient 360° airflow—ideal for open dining areas and shops.

Concealed Ceiling Units

Virtually invisible and whisper quiet, these integrate seamlessly into hotel lobbies and guest rooms.

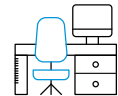

Wall-Mounted Units

Sleek and stylish—great for boutique updates and renovations.

Floor-Standing Units

Targeted comfort where heating is the priority, like seating areas in smaller spaces.

Ceiling Suspended Unit

Designed to deliver impressive load capacity in a compact form, perfect for dining areas and shops.

6 Reasons SkyAir is Built for Your Business

Your business deserves a climate solution that works as hard as you do. Daikin's SkyAir systems provide reliable comfort, reduce energy costs, and adapt naturally to your unique space—giving you one less thing to worry about as you grow your business.

Maximum Efficiency, Minimum Costs

A++ energy efficiency reduces running costs while auto-cleaning technology cuts maintenance expenses by up to 50%. Built for long-term savings, SkyAir delivers a cost-effective, high-performance climate solution.

Reliable, Uninterrupted Comfort

Designed for 24/7 operation, SkyAir ensures consistent performance. In multi-indoor setups, if one unit requires maintenance, the others continue operating—so your business stays up and running without disruption.

Smart Monitoring & Control

Easily manage energy use with remote access via Daikin's cloud-based monitoring system. Smart controls and intelligent sensors optimise efficiency, automatically adjusting airflow and temperature based on occupancy.

Full indoor line up (over 45 different models)

BLUEvolution

Ultra-Quiet Performance

Daikin's indoor units operate at whisper-quiet levels, ensuring a peaceful environment for customers and staff. Optional sound enclosures reduce outdoor unit noise by up to 10 dB(A), making SkyAir ideal for sound-sensitive locations.

Flexible Installation

Extensive piping length allows outdoor units to be discreetly placed behind buildings, on rooftops, or in less visible areas—adapting to different site requirements with ease.

Cleaner, Fresher Air

Advanced filtration removes airborne pollutants and kitchen odors, improving indoor air quality. Variable Refrigerant Temperature (VRT) prevents cold drafts, maintaining consistent, comfortable temperatures.

Let's Make Your Business Better Together

With Daikin's proven technology and commitment to quality, you can create a more comfortable space for your customers and team while lowering energy costs and future-proofing your business.
